Helping founders & enterprises build AI-powered products and scalable software | Co-Founder @ ByteMage
Lahore District, Punjab, Pakistan

Summary

As a co-founder of ByteMage, a software development services company, I specialize in helping startups, founders, and entrepreneurs bring their web and mobile app ideas to life. With years of experience in the industry, I have a deep understanding of the latest technologies and trends, and I am able to provide consultancy on everything from concept development to launch. My expertise includes mobile and web app development, and I have worked with clients in the US, UK, and Europe, developing SaaS products in various verticals such as Real Estate, Social Media, Data Analytics and ERP Solutions.

In my past experience, I have worn many hats, working as an app developer, data scientist, and team lead in startups. My experience in these roles has allowed me to understand the startup ecosystem and the need for fast, elastic individuals. I was one of the founding members of a business analytics startup and was able to help it grow to more than fifty people before I left.

I am passionate about working with startups and enjoy the opportunity to work in multiple roles. I look forward to continuing my work in the startup ecosystem and helping companies grow and succeed. Let's connect to discuss how I can help bring your web and mobile app vision to reality.

Experience

ByteMage

Co-Founder

May 2021 - Present (4 years 5 months)

ShopDev

Software Engineer

March 2021 - May 2021 (3 months)

Lahore District, Punjab, Pakistan

SurveyAuto

Machine Learning Engineer

August 2018 - February 2021 (2 years 7 months)

Lahore, Pakistan

I am working in SurveyAuto as a Machine Learning engineer. We work on applications on ML, specifically Deep Learning and Computer Vision, to do spatial analysis on satellite imagery and other domains.

Besides that, I am also part of platform development team and work on frontend development of our survey platform.

Education

Information Technology University
